Office Action Summary	Application No. 10/760,161	Applicant(s) PETTY, KENNETH PAUL	
	Examiner Charles E. Phillips	Art Unit 3751	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In line 3, "the base of the toilet" lacks antecedent basis in the claim. Line 12 refers to "another L-shaped bracket"; however, no previous such bracket is set forth. The claim consists of multiple sentences but must only consist of only one sentence.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ferdinand in view of Coppedge and Hodges.

See the u-shaped pedal 114 connected to rectangular "shaped base 12, note no back to this element is shown by applicant or Ferdinand. The push arm is seen at 16A. Lacking in Ferdinand is the scheme of mounting the base to the toilet mounting bolts as well as the metallic construction, dual push rod arms and seat L-brackets.

Coppedge teaches dual arms at 23, the L-brackets as seen at 26 and metal construction at line 14 of page 2.

Hodges teach placement of the base of a seat lifter on the base of a toilet bowl in Fig.1 and the attachment thereto via the toilet mounting through opening 40.

It would have been obvious to the ordinary artisan to provide for the respective teachings of the secondary references here to be employed in the Ferdinand device as

Art Unit: 3751

to interchange perfecting features of like devices for their known properties would have been obvious to the ordinary artisan.

Holmes, Gregoire and Bowden et al show other seat lifters.
